

### YOU ARE LOOKING FOR

- someone who can support you in the introduction of a new ERP tool, as your colleagues in charge have no time to extensively deal with this demanding project.

- someone who you can trust, because you are not assured that your colleagues have sufficient know-how to introduce ERP systems and you would like to support them.

- someone who you can ask how to optimally customize ERP for your company's accounting

- someone whose judgment you can rely on when problems in the accounting occur that you cannot solve alone.

### YOUR SEARCH IS OVER

We help you **introduce ERP** together with your software provider **from start to finish**. We put together a project team according to your requirements and prepare a project plan together with your ERP software provider.

We make sure that your scarce resources do not build a **bottleneck** in this process and your **investment** in ERP produces the expected **increase in efficiency**.

We make sure that **illness or vacations in your team** do not delay the introduction of ERP and that your team does not have any reservations against using ERP.

We help your accounting team during the difficult times of a software change to be able to cope with the bookkeeping in this period. We define the end of the project together with you.
